

However, all that changed the day I learned what many people were taught, “Merit for merit and sin for sin.” I learned that making merit would not erase the sin I committed.

It is unreasonable to think that doing good can erase the bad. If I abused my wife and then gave money to a beggar, does that erase the evil I did to my wife? No!

I was worried about having no way to erase the sin I’ve committed in my life. But then I grew very concerned as I realized that I was born in this world because I had karma from my previous life that needed to be paid for in this life. However, in this life, I was committing more sins that would require many more lifetimes.

I saw my life as a never-ending cycle of rebirths. I grew very discouraged as I realized that I was hopeless and would never go to heaven.

Then one day, I went to visit my older brother. He told me that he became a Christian and knows he is going to heaven. A ray of hope entered my heart as I wondered if I could go to heaven too. He introduced me to the Christians’ Bible and told me that I would find my answers in this book. I was surprised to learn that Asians wrote the Bible. I wondered if maybe this book had answers for me.

I began learning what the message of the Bible was all about. I was amazed to find that the Bible had answers to my questions and solutions to my problems. It even had the solution to my greatest problem, “How to erase the bad I committed.” There was hope after all. I followed that path and today, I know that my sin is gone and that I am going to heaven after I die.

I found my answers in the Bible. Maybe you wonder if this book has the answers you

need. If so, I recommend to you a FREE Bible study available from MITTAM Foundation. Upon completion of the course, you will be mailed a certificate of completion from America.

To study by POST, send SMS with code CP-4, your name and mailing address to 087-193-7157.

I was hopeless knowing that
I would never go to heaven.

I was just the average Thai. I wanted to have fun and make money. I wasn't very religious, but I would go to the temple once or twice a year. However, after breaking one of the Buddha's commandments I would do extra merit hoping to cancel out the sin I just committed.
